Note: TV Streaming over LAN: Your device requires a Wi-Fi or wired connection to the router or access point.
TV Streaming over the Internet: Your device requires a Wi-Fi or wired Internet connection with an uplink speed of min. 256kbit/s or Wi-Fi hotspot or a 3G connection.
See <http://distan.tv/manuals> for detailed instructions for your home router.

Technically speaking

Broadway is a networked TV receiver which has a built-in dual DVB-T tuner, plus a high quality H.264 video compressor and a network adapter (wired and wireless). Broadway uses the built-in H.264 compressor to convert the live TV signal to a compact H.264 format, and then transmits the compressed TV signal to your home router. The router will forward a TV signal to either a Wi-Fi connected device or to the Internet. The built-in Wi-Fi adapter supports 802.11g plus the new high speed 802.11n. Broadway is a standalone "box" which is ready to stream live TV at any time. The setup of Broadway is done through a web browser on any device which is connected to your router. Broadway is also equipped with an Audio/Video input. You can connect any device such as a cable or satellite box or a video camera.

BROADWAY by Hauppauge is a brand new solution to stream live-TV to your iPhone, iPad, Android Phone or tablet - at home and anywhere via the internet. Imagine, you watch your home TV program on your iPhone or Android phone in a cafe in Paris or a hotel lobby in Las Vegas - in perfect quality. BROADWAY is a networked TV receiver with two integrated DVB-T tuners and support for the ultra-fast 802.11n wireless network standard. BROADWAY brings your home DVB-T signal or live video from your analog camera wirelessly to mobile Apple devices - the iPhone, iPad, iPod or Android phones or streams it throughout your home to any PC or MAC.

Broadway set-up is as easy as 1-2-3:

1. Connect a TV antenna or cable TV signal to Broadway
2. Connect Broadway to your Wi-Fi router
3. Using Wi-Fi on your Apple mobile device or Mac, open a browser and type in <http://distan.tv>

You can now fully control Broadway. Scan for TV channels and set up an Internet connection to Broadway.
