

# Hauppauge Broadway FAQ

---

This document covers some Frequently Asked Questions about the Hauppauge Broadway.

## What is the Hauppauge Broadway?

The Hauppauge Broadway is a brand new way to watch live TV on your Windows, Apple and Android devices at home or around the world!

## What sets the Broadway apart from its competitors?

The Broadway is vastly superior to similar devices on the market today; here are just some of the Broadways leading features:

- **Cross-device support.** Stream to any Android device running 2.2 (“Froyo”) and above, iPhone, iPad or iPod Touch running iOS 3.0 and above, any Windows XP, Vista and 7 machine, and any Mac running OSX 10.5 and above.
- **Built-in wireless networking.** Unlike the competitors, the Broadway doesn’t need to be next to your wireless modem/router. Setup the Broadway wherever there’s an antenna port and connect wirelessly to your existing home network.
- **External AV inputs.** Connect your external video products via composite or s-video for streaming.
- **Localised Australian Firmware.** Hauppauge always fine-tune their drivers and firmware for Australian DVB-T frequencies.
- **2-year local warranty.** Feel confident that the Broadway will work for years to come and local Australian Distributor support is only a phone call or email away.
- **USB connection** for future applications.

## Do I need to install an App to view on my iPhone, iPad, mobile Android device or PC/MAC?

No, all you need to do is open up your default web browser and enter “distan.tv” in the address bar.

## Can I connect to my Broadway outside of my house?

Yes, once set up, you can stream LiveTV or the external AV input to any mobile device or desktop, anywhere in the world.

## Can I connect multiple Broadway units?

Yes, add multiple Broadway units to your network to expand the number of tuners available.

## What are the External AV inputs used for?

You can utilise the external AV inputs to connect your Cable TV service or a house video camera for easy monitoring from your phone, tablet or desktop computer either within your home or while travelling.
