

Matrox Video Editing Products

Matrox MAX is a unique technology which implements faster than realtime H.264 encoding for resolutions ranging from iPod to HD. It uses a dedicated hardware processor to accelerate the creation of H.264 files for Blu-ray, the web and mobile devices. By using specialised hardware acceleration, jobs are finished with amazing speed and system resources are liberated for other tasks. Quality and flexibility are ensured through direct integration with professional applications such as Apple Compressor on the Mac and Adobe Media Encoder on the PC. As an added benefit, the Matrox MAX technology allows direct export from Compressor to higher quality H264 Blu-ray compliant files.

MXO

Matrox MXO

MXO - MAC
RRP \$1169

Code: MXO/N*
Requires MAC with DVI port

Matrox MXO2: Matrox is leading the way in mobile editing. CompressHD

If you're a professional content creator delivering H.264 files for Blu-ray, the web and mobile devices, you need a fast, flexible, high quality encoding workhorse. Matrox CompressHD is the first implementation of Matrox MAX technology in an amazingly affordable H.264 accelerator card. It lets you create H.264 files, for resolutions ranging from iPod to HD, faster than real time.

CompressHD - WIN / MAC (PCIe)
RRP \$659
Code: MCHD*

Professional accelerator card
for faster than realtime H.264 HD file creation

Multi-IO

Matrox Multi-IO (OEM) The new Matrox Multi™ input/output cards bring a new level of channel density to Mac Pro and Apple Xserve systems. In a single PCIe slot, a Matrox Multi card provides up to four independent inputs or outputs with up to 16 embedded audio channels per SDI stream. User-selectable combinations of 3G, HD, SD, and Dual Link are supported.
